

CORINNA BOLON

Software Developer

FULL-STACK APPLICATIONS

- **Keepr: Social Network for Interest Sharing**, enabling users to visually share and explore new interests by adding images to personal collections
- **AllSpice: Recipe Management Tool**, a secure and user-friendly recipe management solution.

Made using:

- Vue.js with Vue-Router for front-end development
- DotNet WebApi for server-side operations
- Auth0 integration for secure user management
- Dapper as the ORM for database interactions with MySQL
- Adherence to predefined architecture decisions, including controller paths, model names, and data relationships
- Consideration of business rules such as owner-exclusive modification rights

- **Rooted Flow: an Empowering Yoga Application**, where users can create, customize, and execute personalized yoga routines

Made using:

- Express with Node.js and MongoDB with Mongoose to manage databases
- Customized data models, relationships, and system structure based on the unique needs of the Rooted Flow concept.
- Collaborative effort among team members to design a cohesive and efficient system, ensure component interactions, and optimize user experience.

➤ EXPERIENCE

Boise Codeworks (Boise, Idaho)

Software Development Student

(September-December 2023)

- Created an extensive portfolio by completing over 40 projects during the 13-week program, showcasing competence across various languages, frameworks, and technologies.
- Engaged in over 500 hours of comprehensive lectures and labs, complemented by 200+ hours of independent work.
- Actively participated in collaborative team projects, gaining practical experience in SCRUM methodologies, pair programming, and utilizing MVC and Singleton design patterns for application development.
- Demonstrated adaptability by swiftly acquiring new coding languages, concepts, and frameworks. Built a solid foundation in industry-standard software development through immersive coding challenges and hands-on projects.

Sports Club Joyfit 24 Sapporo Miyanosawa (Sapporo, Japan)

Billing Manager

(August 2019-June 2023)

- Conducted seamless communication in Japanese, managing fees and payment statuses for a diverse membership base.
- Efficiently oversaw the monthly billing cycle, reviewing detailed profiles for 1,000+ members with precision.
- Developed and implemented effective payment strategies, leveraging SMS, emails, and calls to prevent outstanding payments.
- Demonstrated excellent time management by adhering to strict billing deadlines tailored to various options.
- Played a key role in training team members on billing procedures and effective strategies.

Group Fitness Instructor

(February 2018-June 2023)

- Rapidly memorized and delivered precise Les Mills Body Pump routines with enthusiasm, ensuring engaging fitness experiences for participants.
- Orchestrated successful events to launch new fitness releases, collaborating with gym management and fellow instructors to create memorable, safe, and motivating performances. This contributed to increased member enjoyment and retention.
- Developed strong communication skills, guiding and motivating up to 35 participants while providing tailored cues to address individual fitness needs. Conducted private training sessions focused on specific member requirements.

➤ SKILLS

- JavaScript / Node.js / Vue.js
- C#
- HTML/CSS
- MongoDB / SQL
- Problem-Solving
- Efficient and Organized
- Strong Communication
- Fluent in Japanese

➤ EDUCATION

- Portland State University, B.A., Liberal Studies Spring 2004 – Summa Cum Laude
- Boise Codeworks Certificate of Completion, 2023
